Ten stupidly easy

things you can do to be accessible

1. Tell people what to expect

2. Remember they don't have your knowledge

3. Make your information memorable

4. Use pictures

5. Use fewer words

6. Listen (properly)

7. People might be hiding it

8. They might not know what they need

9. Creating info and receiving it are different

10. Do nothing

"Inclusion is accessibility with bells on"
